

Get In Gear & Engineer

We are excited to invite students and their parents to our STEM (Science, Technology, Engineering, Math) lab Open House. Our Elementary now has a State-of-the-Art facility where our students can integrate real world situations by doing hands on learning.

Please join us so you and your child can see multiple interactive activities, tour the lab, and meet community leaders that will be represented that evening.

When: Thursday, February 7th

Time: Open House from 5-7 pm

Snacks will be provided and Papa Johns will be on the premises so you can pick dinner up as you leave. Door Prizes will be drawn throughout the evening (gift cards, oil changes, etc.)

This STEM lab has been made possible by a major grant from the Tipton County Foundation.
